

ADITHI M SHROUTHY

DATA-CENTRIC FULL-STACK DEVELOPER

Mannheim, Germany | +4917631549734 adithimshrouthy@gmail.com |

linkedin.com/in/adithimshrouthy | github.com/adithimanjunath

SUMMARY

Full-stack developer with a strong data and quality-engineering foundation: React, Node.js, Python/Flask, SQL/MongoDB, Docker, CI/CD. Built and shipped AI/NLP-powered web apps (BERT/T5/DeBERTa), graph-based routing, and automated test & performance pipelines that raised coverage and cut regressions. Comfortable across the stack-API design, automation, performance/observability- with a track record of measurable improvements to reliability and developer velocity. Looking to build data-driven features and platforms in EU product teams.

PROFESSIONAL EXPERIENCE

SAP SE - Werkstudentin (QA Automation for S/4HANA Cloud) - Walldorf - Dec 2024 - Sep 2025

- Designed TypeScript/Cypress suites for Asset Accounting; lifted coverage +35% and cut manual regression -25% by integrating with GitHub Actions.
- Automated customer scenarios with S/4C tools, reducing manual intervention -40% and improving cross-ERP reliability.
- Built validation workflows for Warehouse Management; surfaced defects ~2 sprints earlier on average.

SRH Hochschule - Research Assistant (DevOps/Tooling) - Heidelberg - Nov 2024 - Feb 2025

- Dockerized dev environments; onboarding time 5h → 3h (-40%).
- Introduced npm dependency management + CI/CD; integration issues -30%, release cadence up.

CWC Recruitment - Working Student (Frontend & Test Engineering) - Remote (Berlin) - Apr 2024 - Oct 2024

- Refined UI components and flows; +18% task completion (usability-tested).
- Built Selenium automation catching 15+ high-priority defects pre-release; aligned results to business acceptance, cutting delays -20%.

FIS Global - QA/Performance Engineer (Banking) - Bangalore - Aug 2021 - Aug 2023

- Engineered performance test harnesses for batch jobs, SOAP/REST; improved response times ~30% across releases.
- Used Dynatrace/AWR/NMON to detect bottlenecks; incident resolution -20%.
- Authored 50+ functional & non-functional cases; 95% traceability in Agile sprints; reduced critical prod leakage -25%.
- Proposed test-automation roadmap to VP Mobile Banking; influenced adoption.

SKILLS

Full Stack: HTML | CSS | Reactjs | Python(Flask) | SQL | Rest | Node Js

Machine Learning: Bert | T5 | Pandas | Scikit-Learn | Deberta

DevOps & QA: OpenShift | JMeter | GitHub Actions | Ci/Cd | OpenShift Maintenance | Docker | Postman | Cypress | Render | Agile Project Management

Observability & Performance: Dynatrace | Nmon | Awr

PROJECTS

Collaborative UX Research Platform (Master's Thesis) - React, Flask, Python, Docker, HuggingFace, GitHub Actions, Vercel

- Full-stack app enabling real-time collaboration, AI-assisted tagging & reporting; reduced manual tagging –50% with BERT/T5/DeBERTa.
- Docker + CI/CD; 99.5% uptime with automated monitoring; usability testing improved stakeholder engagement +40%.

Optimal Route Calculator (Public Transport) - Flask, Neo4j (graph), Redis

- Graph algorithms + caching; –60% query latency. Emphasize data modeling on graphs, path finding, and caching strategy.

Forest Fire Prediction (B.E. Thesis) - Python, ML

- Benchmarked LR/KNN/SVM/DT/RF; +15% over baseline via feature engineering & tuning; published paper.

EDUCATION

M.Sc. Applied Computer Science (Usability Engineering & UX Design) - SRH Heidelberg - Oct 2023 – Oct 2025

B.E. Computer Science - VTU, India - Aug 2017 - Aug 2021

CERTIFICATIONS

- **Generative AI** - SAP
- **Test Automation** - LambdaTest
- **SAFe 5 Practitioner** - SaFe 5
