PROFESSIONAL SUMMARY

Software Engineer with fullstack experience in PHP/Laravel and React, currently building the front-end and admin tooling for KitaMatch, a childcare-matching product at ZEW. Combines hands-on development with experience integrating AI/NLP models into applications (HuggingFace, BERT/T5) and a strong QA-automation background. Comfortable owning features from UI and UX decisions through to deployment.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER | ZEW - MATCHINGTOOLS | MANNHEIM, GERMANY

FEB 2026 - Present

- Own front-end development for KitaMatch, a childcare-matching platform used by German municipalities, by building interfaces against a Laravel backend, shipping the product's first self-service features within 4 months of joining.
- Built an internal admin-tooling/self-service UI in PHP/Laravel that let non-developers manage configuration directly, cutting reliance on developer intervention.
- Drive all UX/UI decisions across the product, consistency, usability, and accessibility, applying my MSc UX-engineering background end-to-end.

LECTURER | SRH UNIVERSITY OF APPLIED SCIENCES | REMOTE, GERMANY

Nov - Dec 2025 | May 2026 - Present

- Teach Software Engineering and CS Fundamentals to ~60 bachelor students, designing the full 12-session curriculum, assignments, and final examination from scratch

WORKING STUDENT | SAP SE | WALLDORF, GERMANY

DEC 2024 - SEP 2025

- Automated **critical test cases for Asset Accounting in S/4HANA Cloud**, improving test coverage by **35%** and cutting manual regression cycles by **25%**
- Reduced manual intervention by **40%** through customer scenario automation using S/4C tools, strengthening test reliability across ERP processes.
- Performed end-to-end validation of Warehouse Management workflows, surfacing defects an average of 2 sprints before the prior release's detection point.

RESEARCH ASSISTANT | SRH HOCHSCHULE, HEIDELBERG | HEIDELBERG, GERMANY

NOV 2024 - FEB 2025

- Built and maintained **Dockerized development environments**, reducing environment setup time from 5 hrs → 3 hrs (**40% faster onboarding**)
- Introduced **npm dependency management + GitHub CI/CD**, decreasing integration issues by **30%** and accelerating release frequency.

WORKING STUDENT | CWC RECRUITMENT | BERLIN, GERMANY(REMOTE)

APR 2024 - OCT 2024

- Refined UI components and workflows, boosting **task completion success by 18%** (validated through usability testing).
- Designed and executed automated test suites in **Selenium + exploratory testing**, catching **15+ high-priority defects** pre-release.
- Improved cross-functional collaboration by aligning test results with business requirements, reducing acceptance delays by 20%.

SOFTWARE TEST ANALYST | FIS GLOBAL | BANGALORE, INDIA

AUG 2021 - AUG 2023

- Created master data and executed **performance test scripts across batch jobs, SOAP services, and REST APIs**, improving response times by **30%** across multiple releases.
- Leveraged **AWR, NMON, and Dynatrace** to proactively detect and diagnose performance bottlenecks, cutting incident resolution time by **20%**.
- Designed and executed **50+ functional and non-functional test cases** for the banking deposits component, ensuring **95% traceability and compliance with Agile sprint requirements**.
- Logged and managed defects in **JIRA**, collaborating with developers and product owners to drive resolution, reducing **critical defect leakage into production**.
- Standardized the team's defect root-cause process and built a shared QA knowledge base in Confluence, cited by more than 30 engineers and credited with reducing repeat defects across releases.
- Delivered **knowledge transfer (KT) sessions** for new team members, reducing onboarding time by **30%**.
- Presented a **test automation strategy proposal** to the VP of Mobile Banking, influencing roadmap discussions and strengthening executive confidence in automation adoption.

TECHNICAL SKILLS

Programming & Frameworks: PHP/Laravel, Python, JavaScript, React, Flask, HTML/CSS, REST APIs

Testing & QA Tools: Cypress, Selenium, JMeter, Jest, Postman, UAT

DevOps & Cloud: Docker, Red Hat OpenShift, GitHub Actions, CI/CD, MySQL, Git

Platforms: Vercel, Render, Railway, GitHub Hosting

Performance & Monitoring: Dynatrace, AWR, NMON

Methodologies: Agile (Scrum), Continuous Testing & Delivery

EDUCATION

MSc. Applied Computer Science(Usability Engineering & UX Design) SRH Hochschule Heidelberg, Germany	Oct 2023 - Oct 2025
B.E. Computer Science Visvesvaraya Technological University, India	Aug 2017 - Aug 2021

PROJECTS

Collaborative UX Research Platform (Master's Thesis) - *ReactJS, Flask, Python, Docker, HuggingFace NLP, Figma, Research writing*

- Designed and developed a **full-stack UX research platform** enabling real-time collaboration, AI-assisted qualitative data tagging, and automated reporting in a single interface.
- Integrated **NLP models (BERT, T5, DeBERTa)** for sentiment analysis, zero-shot classification, and summarization, reducing manual tagging effort by **50%**.
- Built **Docker-based CI/CD pipelines** with GitHub Actions, deployed on Vercel/Render, achieving **99.5% system uptime** with automated monitoring (Uptime Robot).
- Conducted usability testing with researchers and stakeholders, resulting in a **40% improvement in stakeholder engagement and clarity of insights**.

Forest Fire Prediction System (Bachelor's Thesis) – *Python, ML, Data Preprocessing*

- Co-developed a **machine learning pipeline** to predict forest fire risks based on environmental variables (climate, land use, air quality).
- Applied and benchmarked **multiple ML algorithms** (Logistic Regression, KNN, SVM, Decision Trees, Random Forest) to identify the most accurate predictive approach.
- Improved prediction accuracy by **15% over baseline models** through feature engineering and hyperparameter tuning.
- Co-authored and published "Forest Fire Prediction using ML and AI" in IJARIT.

Optimal Route Calculator - *Flask, Neo4j, Redis*

- Designed backend for public transport route planning using graph algorithms & caching, improving query response time by 60%.

FitSync Web App - *React.js, Tailwind, JWT Auth*

- Built a React fitness-tracking app (JWT auth, calorie tracking, dashboard) and validated it through usability testing with 10 users, reaching an 85% task-success rate

CERTIFICATIONS

- Generative AI at SAP- SAP**
- Test Automation Professional Certificate-LambdaTest**
- Certified SAE® 5 Practitioner-Scaled Agile, Inc.**

EXTRA CURRICULAR and LEADERSHIP

Class Representative *Master's in Applied Computer Science & B.E. in Computer Science*

- Acted as liaison between students and faculty, supporting academic and administrative communication.

NCC Cadet National Cadet Corps, India (2011–2015)

- Completed military training (drill, rifle shooting, first aid); engaged in disaster relief and awareness campaigns; developed leadership and teamwork skills.

Volunteer National Service Scheme (2018–2019)

- Participated in social outreach and environmental awareness initiatives.
